

Daily Rainfall Monitoring

The following figures show the observed rainfall in the last 15 days in Maldives.

14 May 2023

15 May 2023

16 May 2023

17 May 2023

18 May 2023

19 May 2023

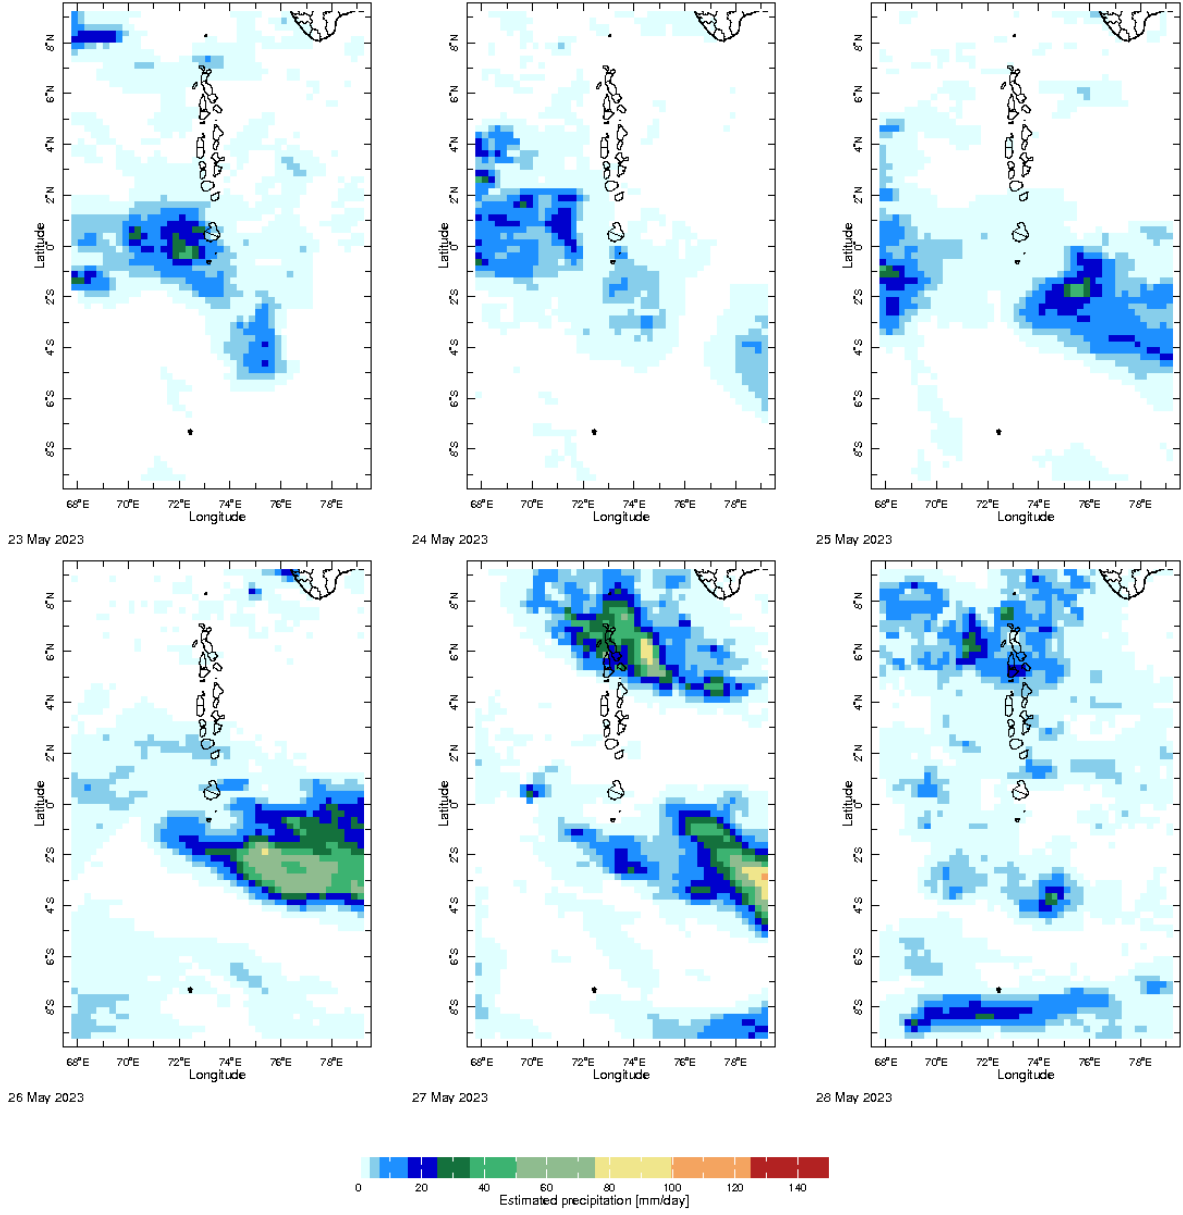

20 May 2023

21 May 2023

22 May 2023

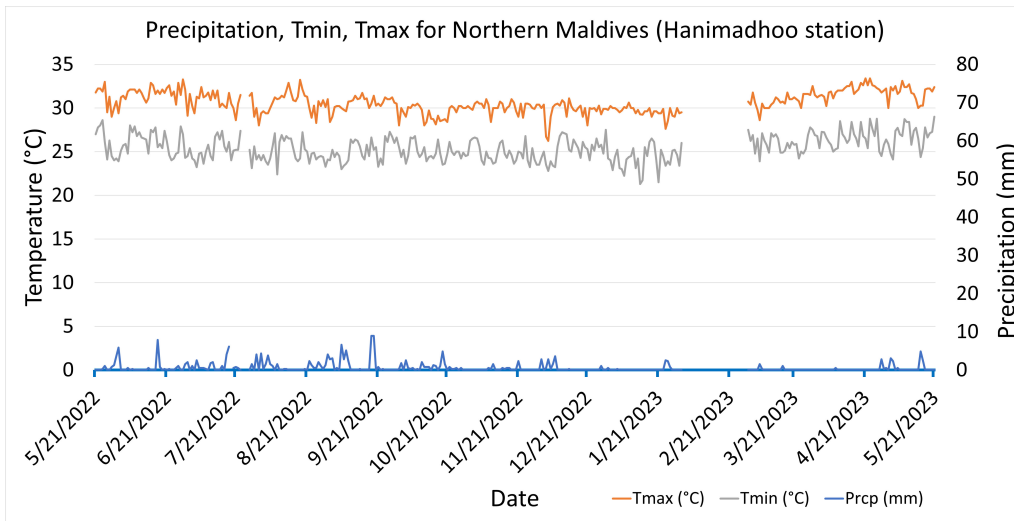

Monthly Rainfall Monitoring

The figure shows the average observed rainfall in the previous month.

Monthly and Seasonal Monitoring

Northern Maldives:

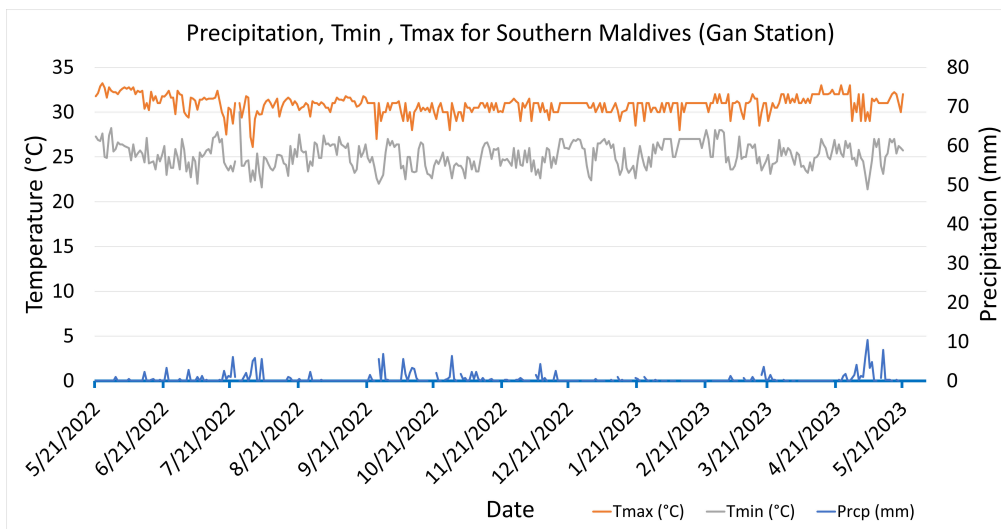

Daily Rainfall, Tmin & Tmax for the previous year in Hnimadhoo station (2022 May to 2023 May)

Central Maldive

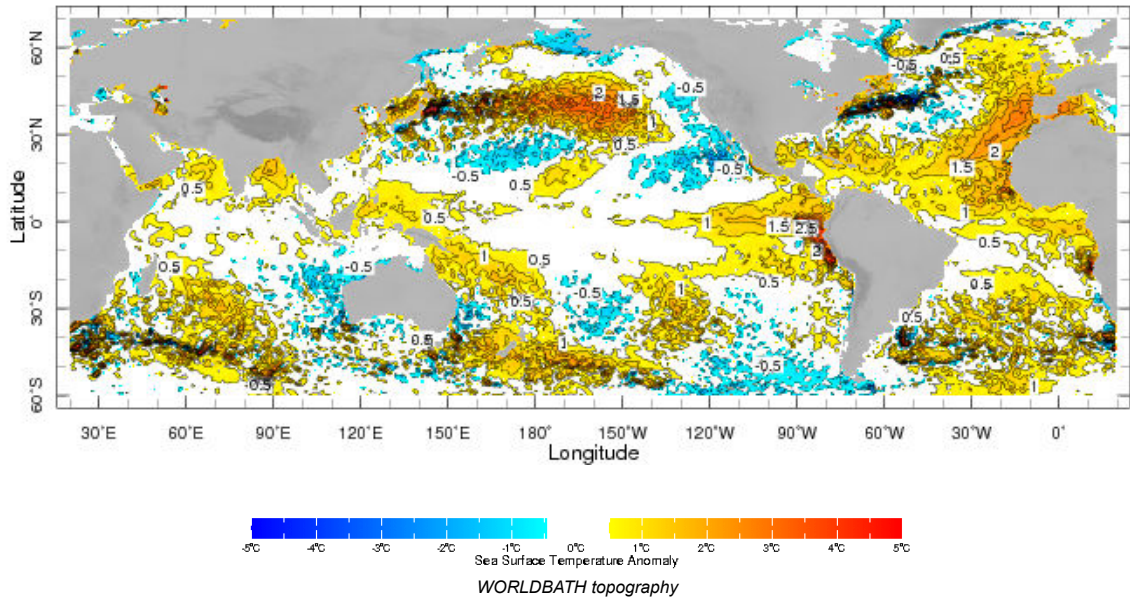

Daily Rainfall, Tmin & Tmax for the previous year in Male station (2022 May to 2023 May)

Southern Maldives:

Daily Rainfall, Tmin & Tmax for the previous year in Gan station (2022 May to 2023 May)

zlev 0.0 meters Time 2-8 May 2023

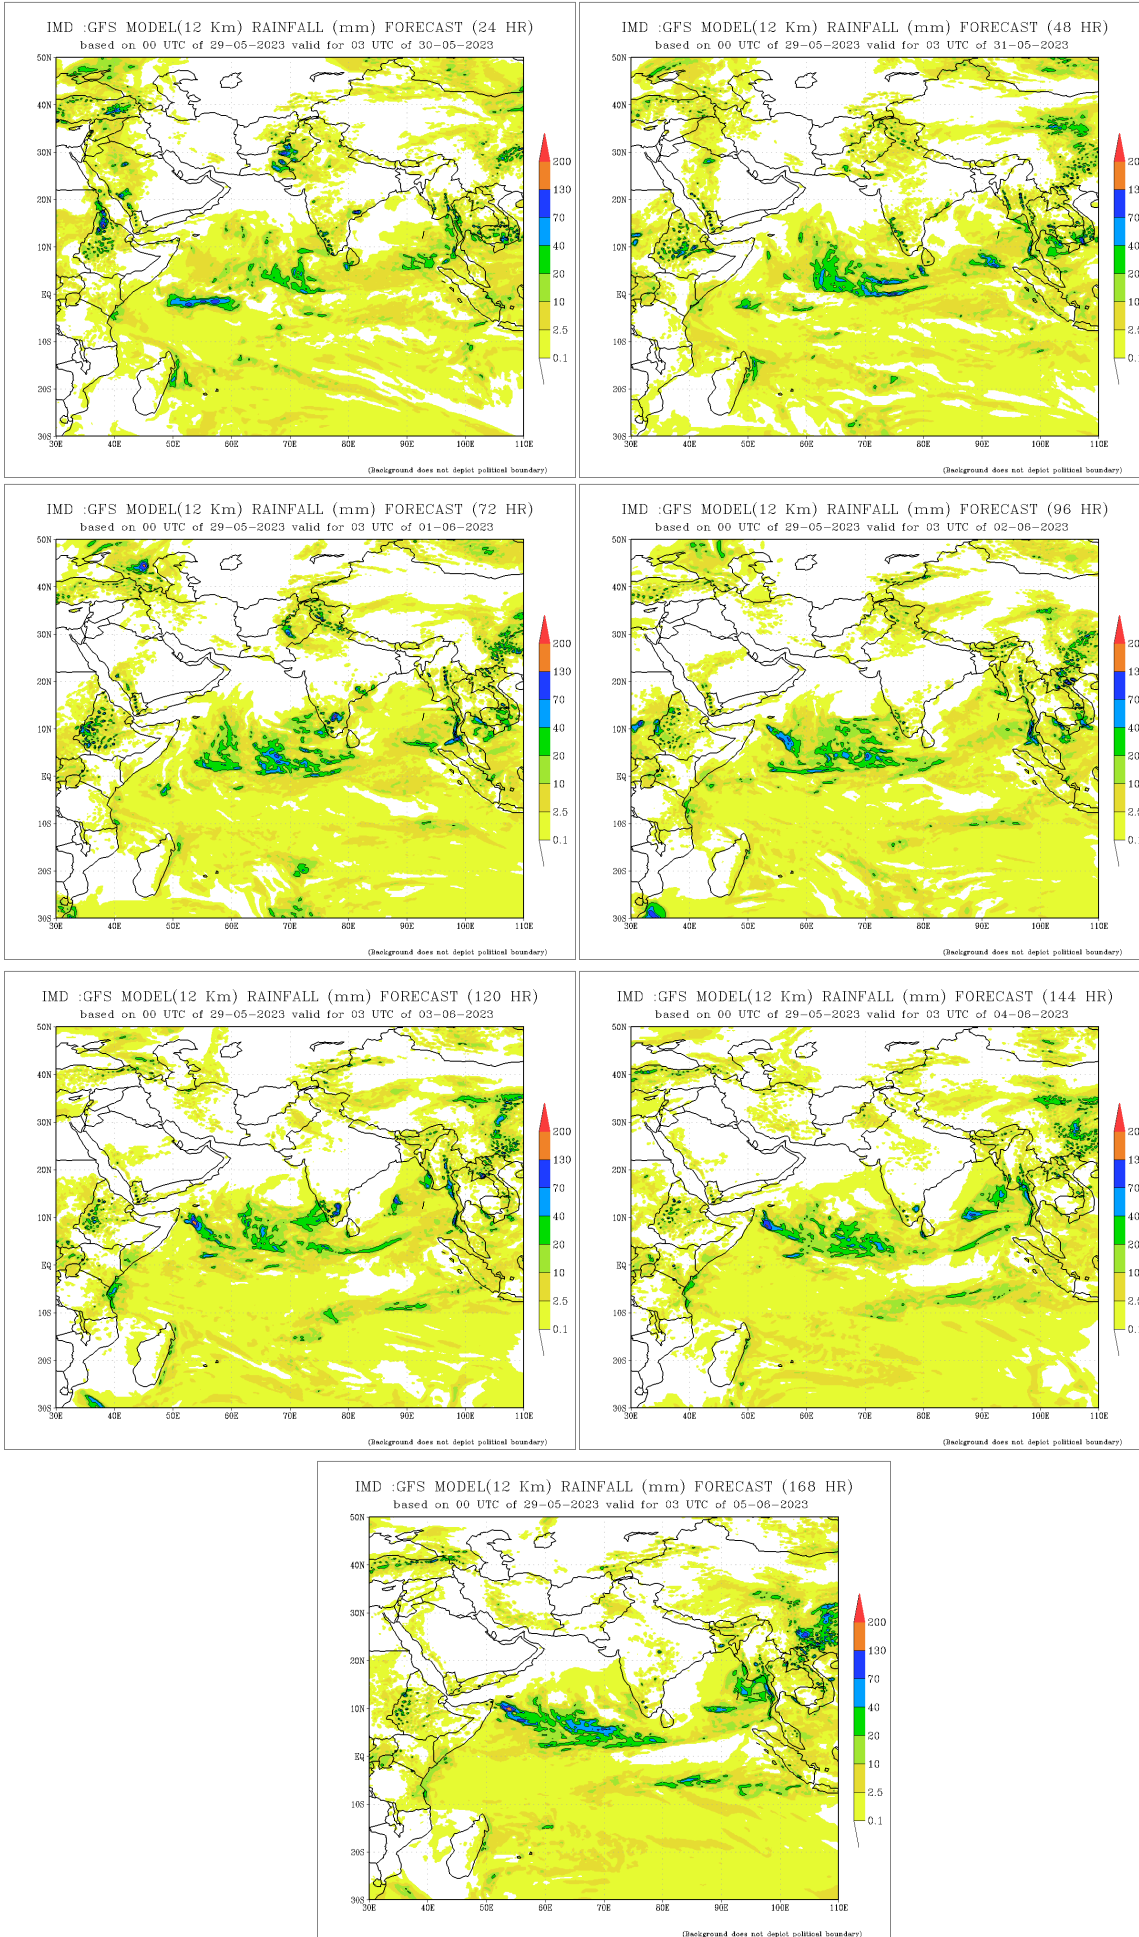

Dekadal (10 Day) Satellite Derived Rainfall Estimates

Daily Rainfall Forecast

Daily Rainfall forecasts (up to 7 days ahead) from the IMD is provided in figures below. These predictions are from the GFS (T1534) model covering the entire south Asian region.

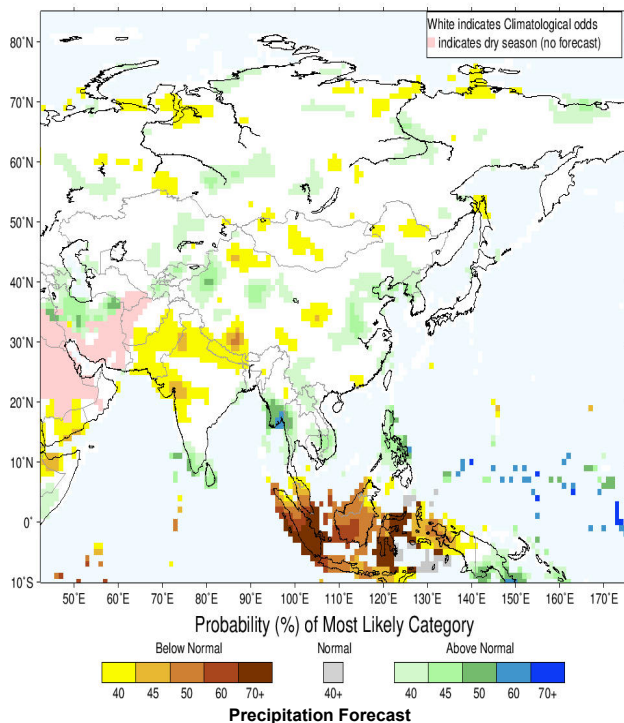

Bi-weekly Precipitation Forecast

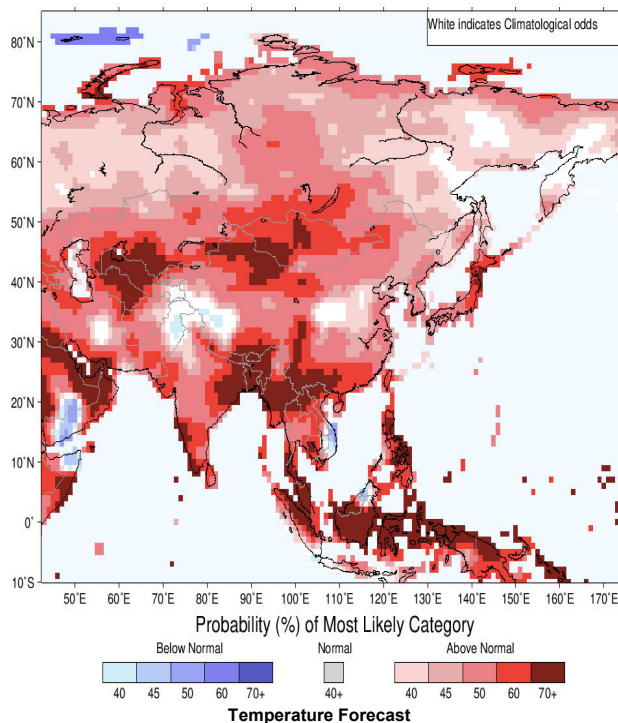

Seasonal Rainfall and Temperature Forecast

Following is the latest seasonal precipitation and temperature prediction for the next 3 months by the IRI. The color shading indicates the probability of the most dominant tercile -- that is, the tercile having the highest forecast probability. The color bar alongside the map defines these dominant tercile probability levels. The upper side of the color bar shows the colors used for increasingly strong probabilities when the dominant tercile is the above-normal tercile, while the lower side shows likewise for the below-normal tercile. The gray color indicates an enhanced probability for the near-normal tercile (nearly always limited to 40%).

IRI Multi-Model Probability Forecast for Precipitation for June-July-August 2023, Issued May 2023

IRI Multi-Model Probability Forecast for Temperature for June-July-August 2023, Issued May 2023
