

Daily Rainfall Monitoring

The following figures show the observed rainfall in the last 15 days in Maldives.

15 Aug 2025

16 Aug 2025

17 Aug 2025

18 Aug 2025

21 Aug 2025

22 Aug 2025

23 Aug 2025

24 Aug 2025

25 Aug 2025

Monthly Rainfall Monitoring

The figure shows the average observed rainfall in the previous month.

Monthly and Seasonal Monitoring

Northern Maldives:

Daily Rainfall, Tmin & Tmax for the previous year in Hanimadhoo station (2024 June to 2025 June)

Central Maldives:

Daily Rainfall, Tmin & Tmax for the previous year in Male station (2024 June to 2025 June)

Southern Maldives:

Daily Rainfall, Tmin & Tmax for the previous year in Gan station (2024 June to 2025 June)

Ocean Surface Monitoring

Dekadal (10 Day) Satellite Derived Rainfall Estimates

Daily Rainfall Forecast

Daily Rainfall forecasts (up to 7 days ahead) from the IMD is provided in figures below. These predictions are from the GFS (T1534) model covering the entire south Asian region.

Weekly Precipitation Forecast

Seasonal Rainfall and Temperature Forecast

Following is the latest seasonal precipitation and temperature prediction for the next 3 months by the IRI. The color shading indicates the probability of the most dominant tercile -- that is, the tercile having the highest forecast probability. The color bar alongside the map defines these dominant tercile probability levels. The upper side of the color bar shows the colors used for increasingly strong probabilities when the dominant tercile is the above-normal tercile, while the lower side shows likewise for the below-normal tercile. The gray color indicates an enhanced probability for the near-normal tercile (nearly always limited to 40%).

IRI Multi-Model Probability Forecast for Precipitation for September–October–November 2025, Issued August 2025

IRI Multi-Model Probability Forecast for Temperature for September–October–November 2025, Issued August 2025
